METRICS OVERVIEW

The metrics in this section are compared between their last complete period and the immediate preceding time period.

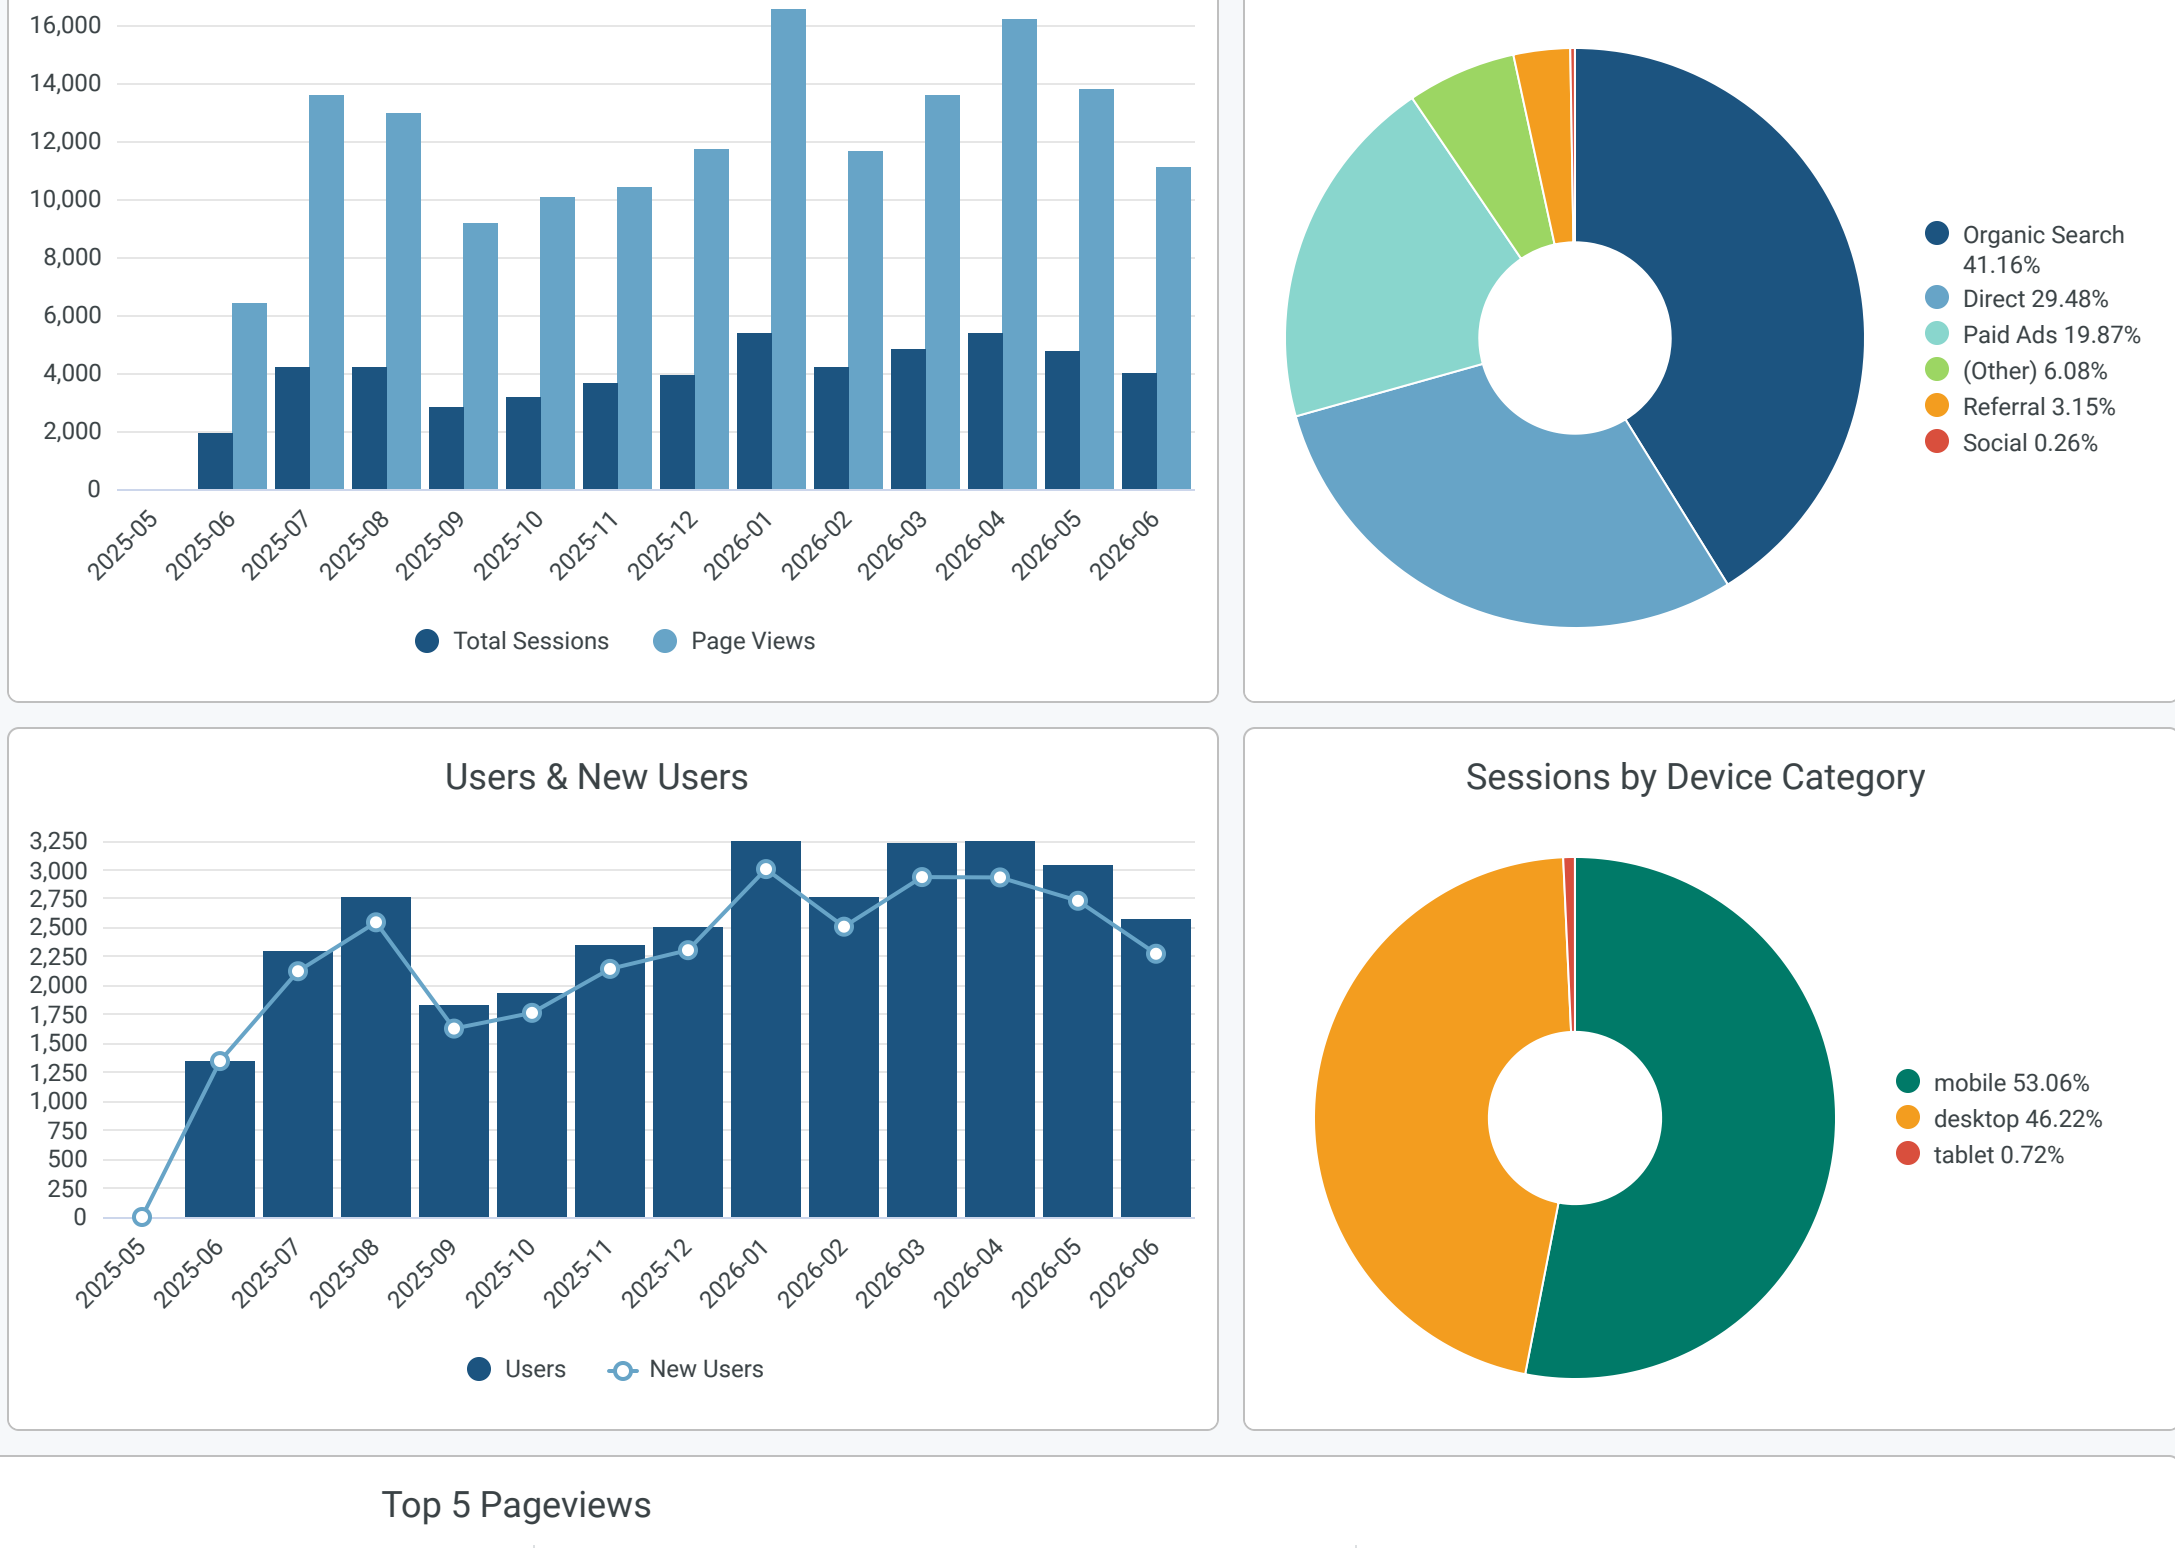

WEBSITE TRAFFIC OVERVIEW:

For a deeper dive, view the following G5 Marketing Analytics reports:

1. Sessions Overview
 2. Key Metrics: Trending

Metric Definitions:

- Active Users:** A unique user who has engaged with your website or landing page within a specified time frame.
- Average Session Duration:** The total duration of all engaged sessions (in seconds) divided by the number of sessions.
- Engagement Rate:** The percentage of sessions that are considered engaged. A session is engaged if it lasts longer than 10 seconds, has at least one Smart Digital Advertising conversion event, or includes two or more pageviews. Calculated as (Engaged Sessions / Total Sessions)*100.
- Medium:** The category of the traffic source that brought the visitors to your website or landing page.
- New Users:** The number of users who visited the website for the first time.
- Pageviews:** The number of times a page on your website or landing page is loaded.
- Sessions:** A group of user interactions with your website or landing page within a specific time frame. A session starts when a user opens your webpage or landing page or views a page on your website or landing page and ends after 30 minutes of inactivity.
- Source:** The origin of your website traffic, identifying where your visitors are coming from.

Inquiry Overview:

For a deeper dive, view the following G5 Marketing Analytics reports:

1. Inquiry Overview
 2. Call Scoring: Trends
 3. Calls Report
 4. Forms Report
 5. Key Metrics: Trending

Metric Definitions:

- Calls:** The total number of calls received for the property or the client.
- Forms:** The number of forms generated from a property's website or landing page.
- Medium:** The category of the traffic source that brought the visitors to your website or landing page.
- Qualified Calls:** Calls processed through the G5 call scoring model that have a high intent to rent.
- Qualified Call Ratio:** The ratio of qualified calls to all calls, calculated as Qualified Calls / All Calls.
- Source:** The origin of your website traffic, identifying where your visitors are coming from.
- Total Inquiries:** The sum of calls and forms received.

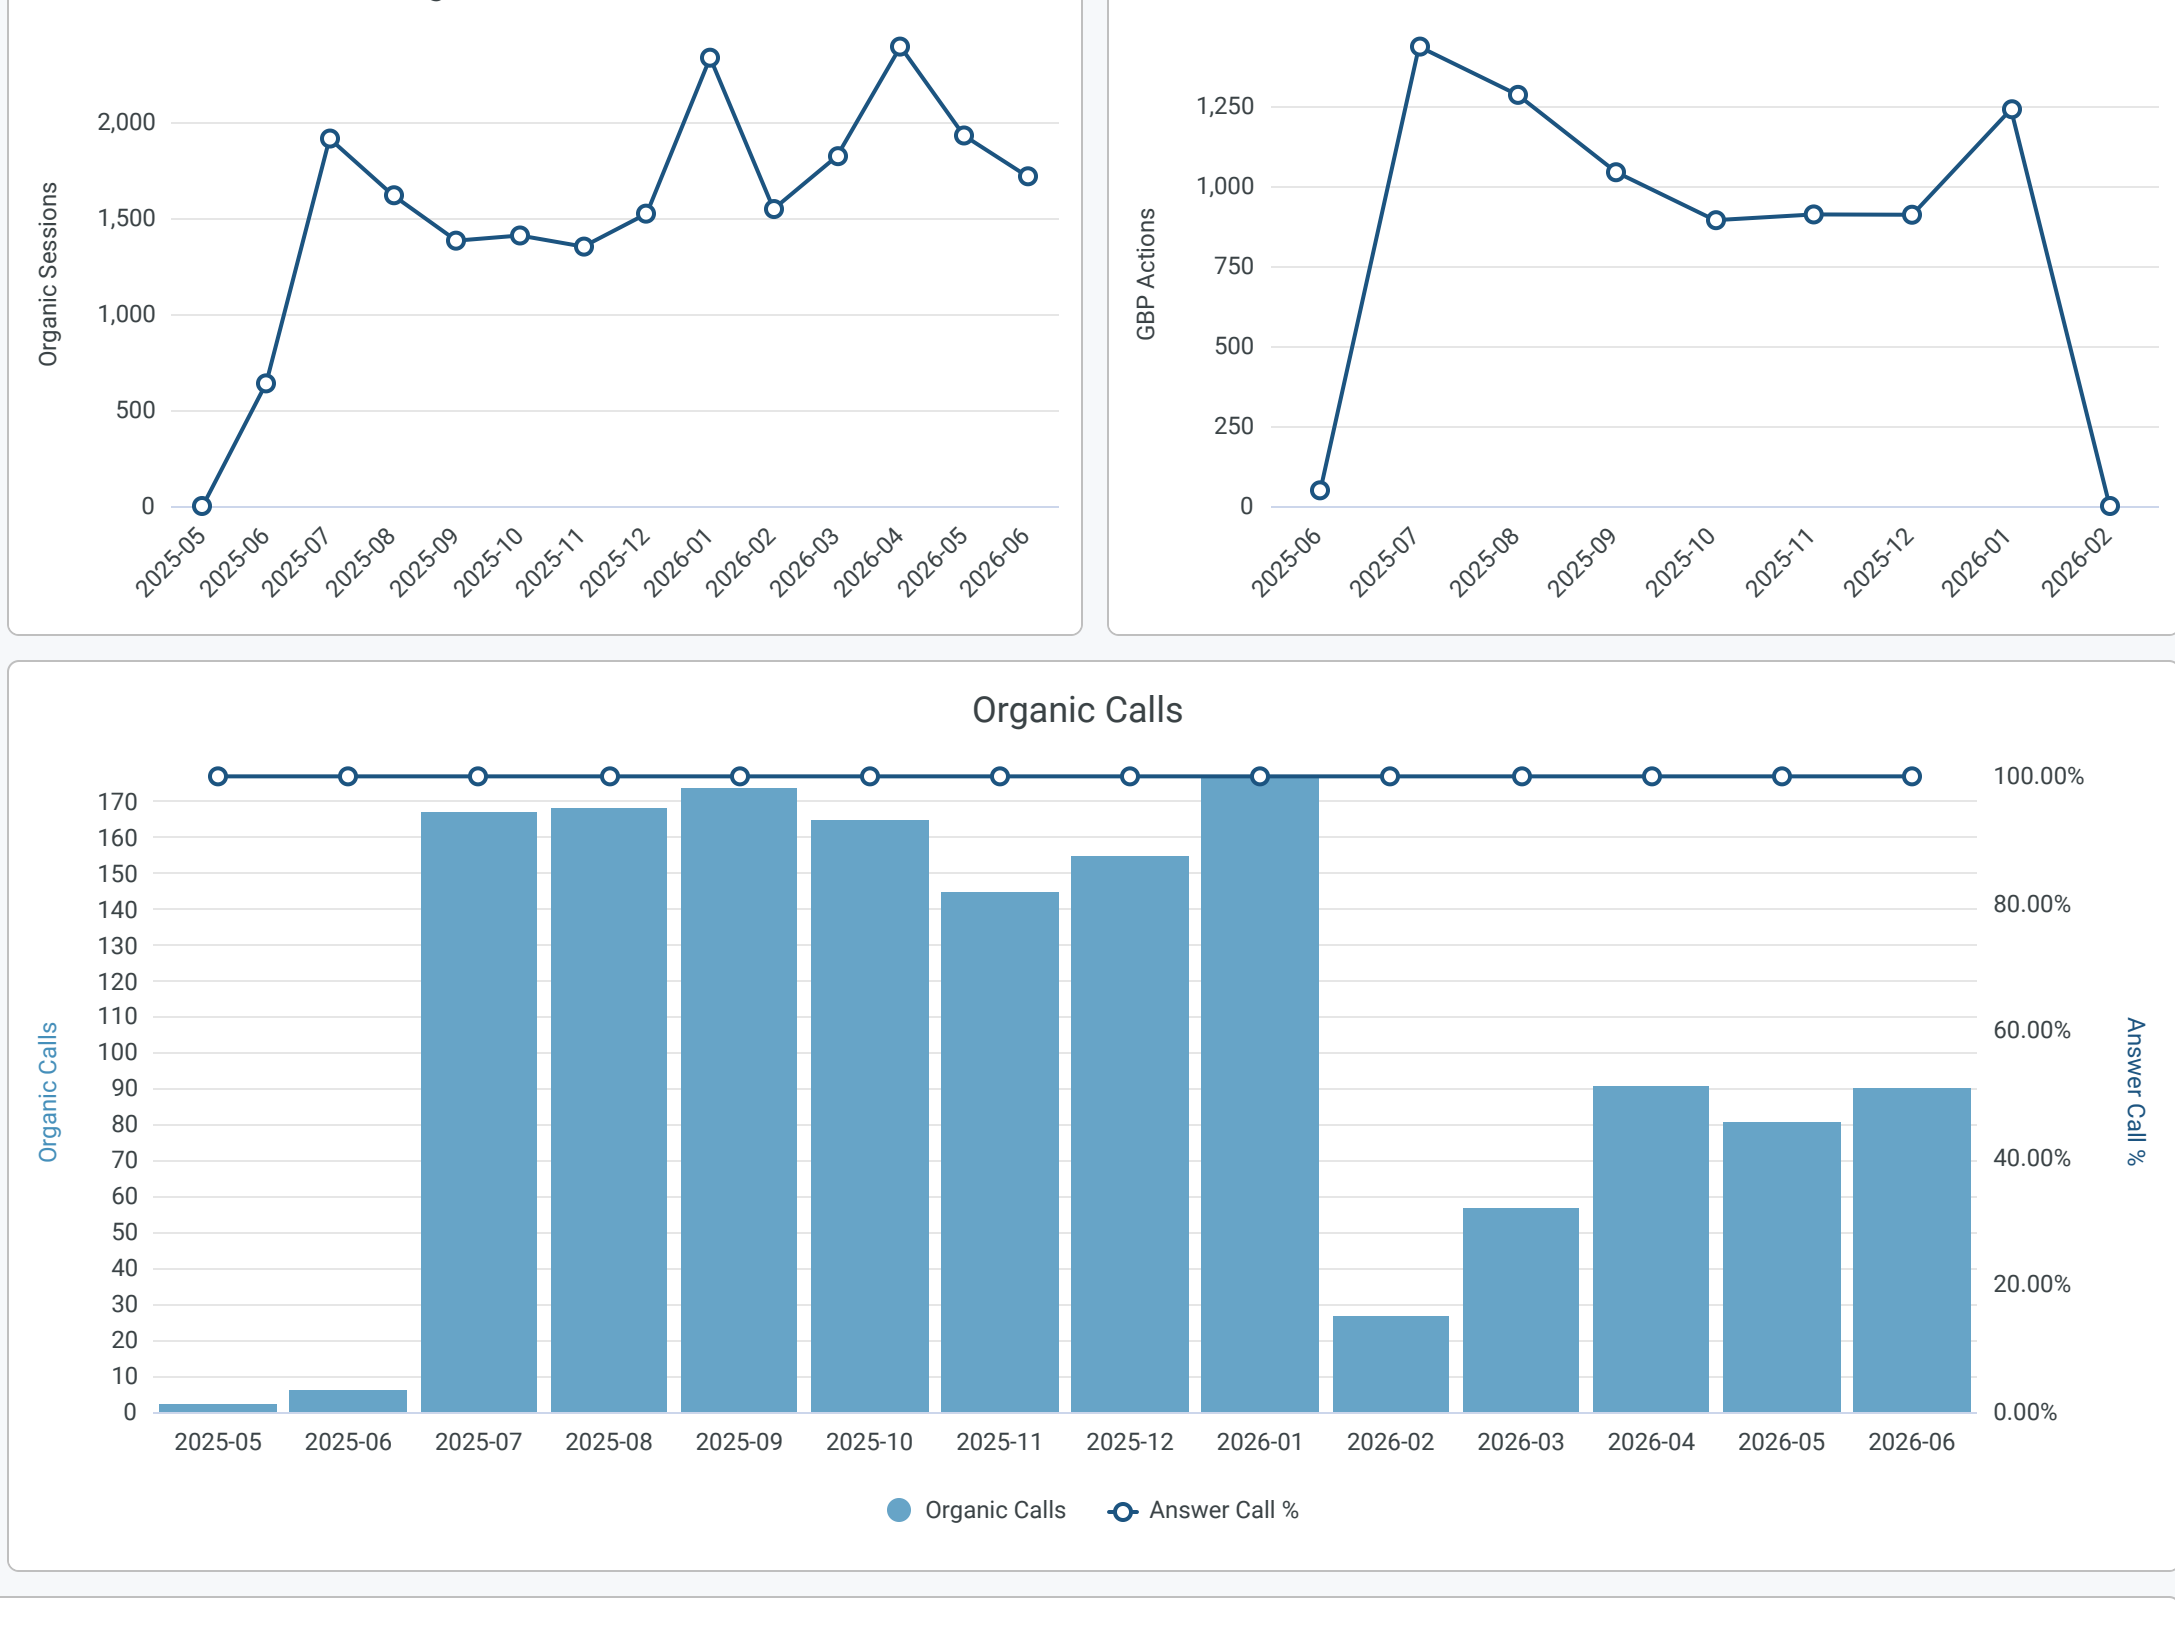

ORGANIC SEARCH PERFORMANCE:

For a deeper dive, view the following G5 Marketing Analytics reports:

1. Organic Search Terms

Metric Definitions:

- Clicks:** The number of times a user clicks on an unpaid search result that appears on a search engine results page (SERP).
- Click Through Rate (CTR):** The ratio of clicks to impressions, calculated as Clicks / Impressions.
- Impressions:** The number of times a website's link appears in a search engine results page (SERP) as a result of an unpaid, natural search query.
- GBP Actions:** are interactions and engagements that users have with your business listing. Below are the type of actions that are considered:
 - Website Visits:** When users click on the link to visit your business's website.
 - Phone Calls:** When users click on the phone number to call your business directly.
 - Direction Requests:** When users request directions to your business location.
- Organic Sessions:** The total count of user sessions that were influenced by organic search.
- Organic Calls:** The total number of calls received that were influenced by organic search.
